# Did you know?

PET is an abbreviation for Polyethylene terephthalate, a plastic resin and the most common type of polyester. What is so great about PET is that it's safe, strong, versatile and most importantly - highly sustainable. Up to 100% of a PET package can be made from recycled PET, and the material can be recycled again and again. In 2010, over 1.5 billion pounds of PET were recycled into products such as fiberfill, car parts and food and non-food containers. To easily identify if your plastic product is PET, look for the #1 code usually found on or near the bottom of the container. Maryland Plastics is committed to environmental conservation. Our products are recyclable where facilities exist. Please support recycling in your community.
